### Guidelines for Accepted Poster Presentations

Written summary of your abstract:

- a. Objective(s)/Purpose of the study, project or activity
- b. Methods used conducting the study, project or activity
- c. Results of the study, project or activity
- d. Conclusion(s)/Evaluation of the study, project or activity

Viewers should be able to understand your poster without listening to an explanation or reading a report. To improve readability of your poster, consider the following:

- a. Top of your poster: title, author(s) and affiliation name. Sign lettering should not be less than 1" high.
- b. Text: Use a minimal amount of text. Focus on 2 or 3 main points. Use one-line phrases with bullets to highlight key points rather than full sentences. Break up large amounts of text with indented paragraphs.
- c. Type: Use large lettering, at least 3/8" high (approximately 24–30 points), but do not use all upper case letters. Simple, easy-to-read fonts, such as Arial, work best. If text is not legible from three to five feet away, the print is too small.
- d. Graphics: Use basic charts, graphs, tables, clip art, drawings, symbols, color print and photos to illustrate key points.
